

Andrew Gotora

SENIOR DEVOPS ENGINEER · PLATFORM ENGINEERING · SOFTWARE & INDUSTRIAL IOT

Heidelberg, Germany · +49 177 7821261 · andrewgotora@yahoo.com · linkedin.com/in/andrewgotora · github.com/DruHustle · andrewgotora.vercel.app

PROFESSIONAL SUMMARY

Senior DevOps Engineer, software professional, and AI product builder with 10+ years of experience across cloud platforms, enterprise software, industrial systems, and the full delivery lifecycle. Builds CI/CD pipelines, infrastructure as code, container platforms, secure APIs, observable services, and multimodal AI experiences across Azure and AWS. Trained Onesa, an original model using the Llama architecture, from scratch and integrated voice AI, travel intelligence, and AR/VR. Trusted independent contributor from requirements and architecture through testing, deployment, troubleshooting, and operations.

CORE EXPERTISE

DevOps & delivery	Azure DevOps, CI/CD, GitHub Actions, GitLab CI/CD, Jenkins, Git, release management, Agile/Scrum
Infrastructure & cloud	Terraform, HashiCorp Packer, Azure Bicep, ARM templates, Microsoft Azure, AWS, cloud migration
Containers & platforms	Docker, Docker Compose, Kubernetes, AKS, Portainer, Linux, microservices, container networking
Software engineering	C#/.NET, ASP.NET, Python, JavaScript, TypeScript, C++, PowerShell, SQL, REST APIs, OAuth 2.0
Data & integration	PostgreSQL, SQL Server, MySQL, Kafka, Azure Service Bus, JSON/XML, OpenAPI, FastAP
Industrial & edge	OPC UA, MQTT, MODBUS, Kepware, ThingWorx, Node-RED, Cybus Connectware, digital twins, edge SDKs
AI engineering	Model training from scratch, Llama architecture, STT/TTS, conversational AI, RAG, AI travel experiences, AR/VR integration, SAP BTP AI
Quality & operations	Test automation, root-cause analysis, monitoring, alerting, technical documentation, FMEA/FMECA, FAT/SAT

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer	Nov 2022 – Present
BASF Services Europe GmbH · Berlin, Germany	
- Implement and operate Azure DevOps CI/CD pipelines for reliable application delivery across the department. - Contribute to the migration from the Atlassian suite to Azure DevOps, transitioning development and delivery workflows. - Automate repeatable cloud infrastructure and environment provisioning with Terraform, Azure Bicep/ARM templates, and policy-controlled configuration; use HashiCorp Packer for reproducible machine images. - Develop and maintain C#/.NET and JavaScript applications and secure REST integrations for Tax, Legal, and Compliance teams using JSON/XML, OAuth 2.0, and role-based access control. - Build SAP BTP AI solutions including retrieval-augmented generation, Joule Studio agents, document extraction and classification, and custom machine-learning deployments. - Lead troubleshooting and root-cause analysis, addressing delivery risks across security, scalability, reliability, quality, time, scope, and cost.	
Software Developer	Jan 2022 – Nov 2022
Boehringer Ingelheim GmbH · Ingelheim, Germany	
- Designed, developed, and tested C#/.NET applications and REST APIs on Azure, from requirements analysis through integration and maintenance. - Established CI/CD pipelines and Docker-based deployments to streamline repeatable software releases.

SENIOR DEVOPS ENGINEER

Heidelberg, Germany · andrewgotora@yahoo.com · linkedin.com/in/andrewgotora

PROFESSIONAL EXPERIENCE — CONTINUED

IoT Solution Architect and Developer

Jan 2021 – Dec 2021

Product One · Johannesburg, South Africa

- Architected industrial IoT and digital-twin solutions on Azure and AWS, integrating operational technology through OPC UA, MQTT, and MODBUS.
- Co-developed an Exxaro mining-equipment monitoring solution that halved equipment downtime, improved efficiency by 30%, and received an industry innovation award.
- Engineered .NET and C++ edge SDKs and integrated Kepware, ThingWorx, Cybus Connectware, cronetwork MDE, and Node-RED.
- Delivered requirements, design, implementation, integration, testing, client training, support, and a DevOps process for frequent IoT fleet updates.

Software Product Engineer

Jan 2020 – Dec 2020

Hensoldt South Africa · Cape Town, South Africa

- Developed scalable C#/.NET software for advanced spectrum monitoring and analysis in a cross-functional R&D environment.
- Spearheaded CI/CD implementation to improve delivery efficiency and produced comprehensive design and product documentation.

Software Developer

Jan 2016 – Dec 2019

thyssenkrupp Industrial Solutions · Johannesburg, South Africa

- Built C# ASP.NET and Python Django/Flask applications for industrial engineering workflows, reducing feasibility-study costs by 40%.
- Developed web applications using C#, JavaScript, HTML5/CSS, Docker, and Kubernetes.
- Led development of a C# WinForms/WPF desktop application using MVVM architecture.

Electrical Engineer

2014 – 2016

Ansaldo STS / Gear Rail SA · South Africa

- Designed and tested railway signalling systems involving Microlok II electronic interlocking, axle counting, and wayside equipment.
- Generated interlocking logic using C, C++, and SpoorText; supported feasibility, integration, testing, type approval, and commissioning.
- Designed and tested PCB layouts in Altium Designer and performed FMECA, Factory Acceptance Testing, and Site Acceptance Testing.
- Applied FMEA/FMECA, statistical process control, and 8D problem-solving to investigate issues and support corrective action.

SELECTED SPEAKING

Featured Speaker — Enterprise Continuous Delivery & Automation Summit 2026

Berlin · Nov 30–Dec 1, 2026

Case study on modern enterprise delivery platforms; panel on AI in highly regulated industries.

SELECTED PRODUCT

Diaspora Unlocked & Onesa

Built a Zimbabwe diaspora-services platform and trained Onesa from scratch using the Llama architecture, with STT, TTS, conversational intelligence, AI-driven travel, and AR/VR integration.

Smart Factory IoT

Architected a three-repository React/Node and .NET industrial platform with split Vercel/Render delivery, durable MQTT edge control, PostgreSQL/Redis, AAS/AASX, OAuth/RBAC, and immutable GitHub Actions releases.

CERTIFICATIONS & PROFESSIONAL LEARNING

Azure IoT Solutions Architect

PTC Academy · 2021

Software Processes and Agile Practices

University of Alberta · 2019

Data Processing with Python

Nanjing University · 2019

EDUCATION

Bachelor of Electronic and Electrical Engineering Science

University of Johannesburg · 2015

LANGUAGES & WORK AUTHORIZATION

English — fluent

German — B1

Valid German work permit

Software Development Life Cycle

University of Minnesota · 2019

Cloud Migration on AWS and Microsoft Azure

Udemy · 2019

Programming in C#; Developing SQL Databases

SoloLearn · 2019
