Andrew Gotora

SENIOR INDUSTRIAL SOFTWARE & DIGITALIZATION ENGINEER

Industrial IoT · Industrial AI · Cybersecurity · Cloud-Native Systems · Founder, Onesa UG

Heidelberg, Germany · +49 177 7821261 · andrewgotora@yahoo.com · linkedin.com/in/andrewgotora · github.com/DruHustle · andrewgotora.com

PROFESSIONAL SUMMARY

Senior Industrial Software & Digitalization Engineer with more than a decade of experience connecting industrial assets, engineering information, and enterprise systems. Career spans railway signalling and electronic interlocking, Industrial IoT, distributed applications, and enterprise delivery. Combines electrical engineering, C#/.NET and Python software development, cloud infrastructure, and applied AI, with reliability and interoperability at the centre. Senior DevOps Engineer at BASF, working remotely from Heidelberg and assigned to the Berlin office with regular visits. Founded Onesa UG in April 2026 and is developing Onesa AI, with active work in Industrial AI and cybersecurity.

CORE EXPERTISE

Industrial IoT & automation	OPC UA, MQTT, Modbus, Kepware, ThingWorx, digital twins, edge SDKs, OT/IT integration
Software engineering	C#/.NET, ASP.NET MVC, Python, JavaScript, TypeScript, React, C++, SQL, REST APIs
Industrial AI & AI platforms	Open-weight models, RAG, self-hosted infrastructure, model customization and fine-tuning
Cloud-native systems	Azure, AWS, Docker, Kubernetes, microservices, Terraform, Azure Bicep
Delivery & quality	Azure DevOps, GitHub Actions, CI/CD, Agile Scrum, Postman, xUnit, application testing
Data & integration	Relational databases, Entity Framework, Redis, Elasticsearch, RabbitMQ, secure APIs
Cybersecurity & operations	RBAC, managed identities, Azure Key Vault, monitoring, troubleshooting, secure cloud infrastructure
Electrical engineering	PLC programming, embedded C/C++, Altium PCB design, electronic interlocking, FAT/SAT, FMECA

PROFESSIONAL EXPERIENCE

Founder
Apr 2026 – Present

Onesa UG · Self-employed

- Building Onesa AI with Next.js, FastAPI, PostgreSQL/pgvector, and configurable model adapters for European and international applications.
- Developing streamed Chat, cited document retrieval, bounded tool agents, and editable travel suggestions with account ownership and secure sessions.
- Actively developing Industrial AI for evidence-backed investigation and human-reviewed work drafts, alongside cybersecurity work grounded in secure software delivery and cloud infrastructure.

Senior DevOps Engineer
Nov 2022 – Present

BASF · Full-time · Remote from Heidelberg · Berlin office, Germany

- Engineer Azure cloud infrastructure and software delivery with Azure DevOps CI/CD, Terraform, and Azure Bicep across development, QA, and production.
- Implement RBAC, managed identities, and Azure Key Vault for secure service access and secrets management.
- Build and test C# and JavaScript applications in Agile Scrum teams; work remotely from Heidelberg, assigned to the Berlin office with regular visits.

Software Developer
Jan 2022 – Nov 2022

Boehringer Ingelheim · Full-time · Ingelheim am Rhein, Germany

- Designed, developed, and tested C#/.NET RESTful APIs and Azure applications from requirements through integration and maintenance.
- Established CI/CD pipelines and containerized Docker deployments.

IoT Engineer
Jan 2021 – Dec 2021

productONE · Full-time

- Designed Industrial IoT solutions connecting equipment, edge devices, and cloud platforms through OPC UA, MQTT, Modbus, Kepware, and ThingWorx.
- Developed .NET and C++ edge SDKs for heterogeneous devices and OT/IT interoperability.
- Implemented reliable IoT delivery workflows across AWS and Azure; translated engineering and business requirements into maintainable architectures.

Andrew Gotora

SENIOR INDUSTRIAL SOFTWARE & DIGITALIZATION ENGINEER

Heidelberg, Germany · andrewgotora@yahoo.com · linkedin.com/in/andrewgotora

PROFESSIONAL EXPERIENCE — CONTINUED

Software Product Engineer
Jan 2020 – Dec 2020

HENSOLDT South Africa · Full-time · Cape Town, South Africa

- Designed, developed, deployed, and maintained a web application for spectrum management and monitoring in engineering R&D.
- Connected engineering requirements with software implementation and ongoing maintenance.

Software Engineer
Jan 2017 – Dec 2019

thyssenkrupp · Full-time · Johannesburg, South Africa

- Contributed to LFS Digital, generating liquid fuel storage feasibility proposals, plot plans, process flow diagrams, and financial analysis reports.
- Developed C#/.NET, ASP.NET MVC, JavaScript, React, and Python applications using three-tier and microservices architectures, relational databases, Entity Framework, Redis, Elasticsearch, and RabbitMQ.
- Performed Azure/AWS migrations, applied ML.NET, and used Postman and xUnit for application testing.

Electronics and Electrical Engineer
2015 – 2017

Gear Rail · Full-time · Sandton, South Africa

- Delivered railway signalling engineering from feasibility and detailed design through integration, installation, testing, and commissioning.
- Developed C/C++ and SpoorText electronic interlocking logic; programmed Siemens, Allen-Bradley, and Microlok PLC systems.
- Designed Altium lamp-driver PCBs and embedded applications; integrated telecommunications, axle-counting, and track-vacancy systems.
- Performed FAT/SAT and FMECA; supervised factory assembly and site installations, and produced electrical designs and technical documentation.

Graduate Engineer
Oct 2013 – Jan 2014

HVAC International · Pretoria, South Africa

- Implemented and maintained energy-saving systems at Tshepong mine in Welkom.

Graduate Student Researcher
Jun 2013 – Dec 2013

Opti-Num Solutions · Johannesburg, South Africa

- Developed a swine flu detection system using MATLAB.

EDUCATION

Bachelor of Electronic and Electrical Engineering Science
University of Johannesburg · 2015

LANGUAGES & WORK AUTHORIZATION

English — fluent · German — B1
Valid German work permit

SELECTED SPEAKING

Featured Speaker — Enterprise Continuous Delivery & Automation Summit 2026
Berlin · Nov 30–Dec 1, 2026
Case study on modern enterprise delivery platforms; panel on AI in highly regulated industries.

SELECTED PROJECTS

Smart Factory — Asset, telemetry, and edge platform.
Diaspora Unlocked — Zimbabwe diaspora-services platform.

CERTIFICATIONS & PROFESSIONAL LEARNING

Azure IoT Solutions Architect
PTC Academy · 2021

Software Processes and Agile Practices
University of Alberta · 2019

Data Processing with Python
Nanjing University · 2019

Software Development Life Cycle
University of Minnesota · 2019

Cloud Migration on AWS and Microsoft Azure
Udemy · 2019

Programming in C#; Developing SQL Databases
SoloLearn · 2019
